

What Sets Mitsubishi Electric Heating & Cooling Systems Apart

At Kearney HVAC, we specialize in providing high-performance HVAC installations for houses from North Shore, MA to Seacoast NH. This commitment to quality is why we only work with industry-leading brands, like Mitsubishi Electric.

We're a Mitsubishi Electric Diamond™ Dealer, which means that our team of HVAC specialists has undergone extensive training on their innovative systems. Here are just a few reasons why Mitsubishi Electric ducted and ductless mini split heat pumps are unmatched in quality.

Energy Efficiency

Mitsubishi Electric systems utilize advanced inverter-driven compressor technology, which allows them to adjust their performance to match heating or cooling demand, resulting in significant energy savings.

Effortless Home Zoning

Mitsubishi Electric ductless heat pumps operate with air handlers placed strategically throughout your home, offering individual temperature controls and zoned comfort.

Easy to Use Controls from Anywhere

With the kumo cloud® app, you can access your heating and cooling settings at the touch of a button on your smart device, giving you ultimate control of your energy usage.

Quiet Operation

Mitsubishi Electric has some of the quietest heating and cooling systems available on the market today, with indoor units operating as low as 19db!

Reliable Performance

Mitsubishi Electric heat pumps use advanced defrost technology to maintain heating performance in freezing conditions—even in temperatures as low as -13°F!

Versatility & Longevity

Mitsubishi Electric Heating & Air Conditioning systems come in a wide variety of models, and every one of them is built with high-quality materials to withstand regular use and harsh weather.

Save on Mitsubishi Electric Systems with Mass Save® Rebates!

One of the greatest things about Mitsubishi Electric Heating & Air Conditioning systems is that they're eligible for Mass Save rebates up to \$10,000! Combine these rebates with the 25C tax credit, which covers 30% of the cost of installation, up to \$2,000!

FIND THE RIGHT HEATING & COOLING SYSTEM FOR YOUR HOME.
